SUMMARY

Technical Writer and former Senior Software Engineer, with roles within cloud communications and contact center platforms. Created user guides, API references, technical specifications, and architecture documents. Authored documentation from scratch by reading source code, configuration, and API specs, then validating the steps in a working environment to match every document with what the product does. Built Docs-as-Code workflows (Git, Markdown, GitHub Pages, MkDocs, Vale) that cut developers' documentation lookup time by 90%. Worked daily with engineers, DevOps, security, and product managers in Scrum teams.

SKILLS

- **Documentation types:** User guides, API references (OpenAPI/Swagger, REST, SOAP, GraphQL), system setup guides, release notes, troubleshooting guides and runbooks, style guides, information architecture, developer playbooks, identity and authentication service documentation, security and compliance documentation.
- **Tools, markup, and version control:** Git CLI, GitHub, Markdown, HTML, CSS, XML, AsciiDoc, MkDocs, Jekyll, Liquid, GitHub Pages, Vale, CI/CD documentation automation, Agile/Scrum (sprints, standups, retrospectives), Jira, Confluence.
- **Diagrams and technical illustration:** Data flow, architecture, and workflow diagrams in Mermaid, draw.io, Figma, Lucidchart, Miro.
- **Reading code and config:** Python, Java, Spring Boot, JavaScript, Node.js, YAML, JSON, Terraform, cURL, Postman, Docker, Kubernetes, Jenkins, Splunk, AWS, Azure.

EXPERIENCE

Moody's Corporation | Senior Technical Writer (Contract) | 05/2025 – 07/2026

Global financial risk assessment firm.

- Eliminated developer onboarding friction for client teams by creating documentation for platform components handling Cloudflare zone and WAF/CDN/DNS configurations.
- Overcame manual 1:1 engineering onboarding overhead by building GitHub Pages sites for onboarding, configuration templates, and security.
- Established configuration standards and saved developers' lookup time and effort by creating a standardized Python template repository with extensive inline doc comments across YAML files for CI/CD, artifacts, build, deployment, and infrastructure tasks.
- Addressed the lack of standardized documentation for LLM features by authoring developer integration guides for Model Context Protocol (MCP) services in AI IDEs.
- Resolved compliance gaps by creating a security suite consisting of security management guides, developer playbooks, vulnerability remediation runbooks, and SOC 2 evidence mappings for audit readiness.
- Wrote Identity Service L2 support guides and troubleshooting runbooks to streamline onboarding workflows and speed up issue resolution for support teams.
- Authored and optimized 79+ Confluence pages (touching 110+ total pages), driving hundreds of cross-functional page views that streamlined workflows for developers, product managers, and DevOps engineers.

Yahoo, Inc. | Senior Software Engineer | 01/2019 – 05/2024

Digital media and technology company.

- Eliminated developer time lost navigating fragmented legacy documentation by building Docs-as-Code workflows using GitHub Pages, MkDocs, and CI/CD automation, saving 90% of developers' lookup time and effort.
- Provided clear system setup instructions, user guides, architecture diagrams, API documentation, service runbooks, and Splunk dashboards to improve platform usage.
- Led the migration of a Node.js service to Java Spring Boot with error-free data transfer and minimal downtime.

Rally Health (a UnitedHealth Group company) | Senior Software Engineer | 09/2018 – 01/2019
Digital health company.

- Developed backend authorization workflows, resolving healthcare account access issues for members.
- Documented backend authentication services, improving developer adoption and integration.

Xoriant | Senior Software Engineer | 03/2016 – 09/2018

- Engineered a C++-to-Java migration of a backend service handling 250M daily requests and documented architecture changes and migration best practices.
- Engineered REST APIs handling PII and PCI data and wrote the security and compliance documentation for them.

8x8, Inc. | Java Developer | 01/2015 – 03/2016

- Streamlined enterprise cloud phone feature adoption with API documentation and SOAP API specifications that sped up integration for enterprise customer deployments.

Serenova (formerly LiveOps) | Software Engineer | 04/2010 – 09/2014

- Engineered REST APIs, authentication mechanisms, and analytics tools for a cloud contact center platform, and wrote developer documentation that enabled data-driven backend performance tuning.

PORTFOLIO AND OPEN-SOURCE DOCUMENTATION

- **Portfolio** (API docs, user guides, PRDs, information architecture): https://deeptin1.github.io/portfolio/
- **Perses (Cloud Native Computing Foundation Sandbox):** Updated the perses.dev homepage and the perses/perses README to show that Perses supports more than its original four data sources and linked both to the Datasources documentation. Scoped an over-broad CSS rule that was centering every link in the homepage feature-card grid. Two PRs were merged by the project maintainer.
- **Open Sustainable Technology:** Authored metadata definitions for a directory of climate and energy open-source ecosystems, simplifying the collection of thousands of project entries and helping users understand data calculations.
- **AsciiDoc Standards:** Created an AsciiDoc style guide to enforce documentation consistency and adherence to standards across the JustServe platform repository.
- **API Documentation**: Integrated autogenerated API documentation with code samples using Swagger (OpenAPI specification) and Jekyll.
- **NGINX:** Contributed to NGINX open-source documentation to drive product enhancements and improve user support.

EDUCATION AND CERTIFICATIONS

- M.S. in Computer Engineering, Santa Clara University
- B.Eng. in Computer Engineering, Savitribai Phule Pune University
- AI Technical Writing Certification and Technical Writing Certification, Technical Writer HQ
- MFA in Writing (in progress), Dominican University of California
